PERSONAL PROJECTS

Smart Construction

- Application It is an end-to-end project tracking web application for EPC companies. there are many stake holders in the project such as project manager, warehouse manager, on-site engineering, and supervisor · Each one of them have a different user interface. The application has many modules such as construction planning, Procurement, Optimization billing of material, inventory, and construction engineering. · It helps in process Optimization and Process Parallelization. My part in this Application is planning modules and Optimization billing of material, inventory, and construction engineering.

Todo-List

- As a user, I can read a list of tasks. add a task using the mouse or keyboard. mark any task as completed, using the mouse or keyboard. delete any task, using the mouse or keyboard. edit any task, using the mouse or keyboard. view a specific subset of tasks: All tasks, only the active task, or only the completed tasks

Restaurant website

- Used React with React-Hooks(UseState),JSX,CSS to demonstrate the restaurant website shwowing all Menu items. Created a self-made API(advantage is we can add any new menu item on it and it will be rendered on the page automatically). Solved hot reloading problem(which occurs in Version17 and above in react)
